PRINTERRIFIC.NET

think... print... fly!™

Finally ...

a SIMPLE

print-on-demand

solution that saves

you time and money!

Think ...

Print ...

Fly ...

Think ... use your creativity

Your customers create a print job using any Windows application, including all industry-standard graphics production software. The creative process is enhanced as your customers use all of the tools they are already familiar with.

Print ... the way you always do

Users click on File, Print, PrinTerrific.net, a Windows “virtual printer” which is part of our revolutionary print on demand software from PrinTerrific.net. What could be simpler than printing to PrinTerrific.net?

Fly ... above the competition

as jobs are delivered electronically through the Internet to your print shop, and back to the customer using UPS shipping in record time.

All digital instructions and files necessary to complete the print job (fonts, color separation instructions, DPI resolution, page orientation, bleeds, to name a few) are seamlessly rushed through the Internet to their destination: your own exclusive, secure, and confidential PrinTerrific order processing system.

Subscribers receive a private login to a powerful, secure order fulfillment Web site accessible from the Internet, which allows users to log in using industrial-strength 128 bit encryption available in

the latest standard browsers, or wireless personal digital assistant (PDA).

Keep apprised of your order status instantly as PrinTerrific.net sends you an alert by e-mail or pager when orders arrive and/or status changes.

Time-wasting “screen jumping” between incompatible packages, and repetitive key entry are eliminated as you and your employees manage order fulfillment in one integrated software system. Print-production files, customer order instructions, payment processing, UPS shipping labels and UPS tracking are all available in one place, one screen. Customers are informed by e-mail that their UPS package is on the way, with complete one-click tracking instructions!

Be on the cutting edge.

Act now and watch

PrinTerrific.net

enhance your business today!
